Sir,

The notion of drug testing Federal employees is contrary to the ideas of freedom and liberty. This is another waste of tax dollars that proves nothing other than a person violated a law that has no victim

I realize that the "drug testing industry" has effectively bribed their way into public discourse. Setting policy in this fashion is thuggery at best.

Either an employee is productive or not, which should be evident from their output. In my opinion, when a supervisor endorses encroachments on privacy, it is the supervisor that should be fired.
